## DRIVELINE

### CHAIN DRIVE DESIGN

Single-stage 80 HT drive chain transmits power from the drive motor to each wheel. Quick and easy external adjustment for proper tension.

### INFINITELY VARIABLE SPEEDS

Speed transitions within a range of 0-5.9 mph in both forward and reverse.

### DYNAMIC BRAKING

Moving the hand controls to the neutral position brings the unit to a stop. Engage the parking latch by raising the seat bar.

### DIRECT-DRIVE TRANSMISSION PUMPS

Two variable displacement piston pumps deliver oil to corresponding hydrostatic motors for independent control of each side. Pumps are mounted in tandem and are driven directly

## OPERATOR ENVIRONMENT

Seat bar serves as an operator restraining device and armrest. Two servo-assisted low effort "hands-only" levers control direction and loader functions. Optional auxiliary hydraulic foot pedal control for precision applications or continuous hydraulic flow as

## MONITORING SYSTEM

Systems normal light, flashing low fuel level, hourmeter and LED warning lights and audible alarms.

### LED WARNING LIGHTS

Hydraulic filter – Fuel level – Air cleaner restriction

### LED WARNINGS WITH AUDIBLE ALARMS

Engine oil pressure – Seat belt – Alternator – Transmission oil temperature – Low battery voltage – Engine coolant temperature
